Portfolio:

PROFESSIONAL SUMMARY

Data Analyst with 3+ years of combined experience in business intelligence, data analytics, and software development, with hands-on expertise in SQL, Python, Power BI, MS Excel and relational databases. Experienced in data extraction, cleaning, transforming, validating for analysis and reporting. Skilled in KPI reporting, building interactive dashboards, EDA process, data modeling, business reports and presenting technical finding. Strong foundation in data quality, process improvement, translating business requirements into analytical solutions and data-driven recommendations. MSc in Data Science with additional experience in machine learning model evaluation, predictive analytics, statical analysis and AI-driven analytics.

SKILLS

Database	: SQL (MySQL, PostgreSQL)
Programming	: Python, R, Go, JavaScript
Data Visualization	: Power BI, Microsoft Excel, Tableau
Data Integration	: ETL/ELT, PySpark, Airflow, Azure Data Factory, Databricks
Machine Learning	: Regression, Classification, Feature Engineering, Model Evaluation
Cloud	: AWS (EC2, S3, Glue, Redshift)
Version Control	: Git, GitHub
Soft Skills	: Analytical Thinking, Problem-solving, and communication skills

EXPERIENCE

Data Analyst-(Business Intelligence)

March 2022 – Jun 2024

Viettel Construction Myanmar (Mytel Telecommunication Group)

- Built and maintained ETL pipelines using Microsoft Excel and SQL to extract, clean, transform, and validate operational data for Power BI reporting and business analysis, improving data accuracy, consistency and reporting reliability.
- Developed interactive Power BI dashboards to monitor KPIs, customer behavior, operational performance, and business metrics, enabling stakeholders to make data-driven decisions.
- Analyzed customer behavior, service and operational performance data using SQL and Power BI to identify KPI trends, anomalies, root causes, and actionable insights, supporting data-driven decision-making across business and operational teams.
- Performed reliable reporting that improved KPI visibility, enabling management and operational teams to access information more quickly and identify service issues.
- Collaborated with project managers, regional stakeholders, engineers, and operations teams to understand analytical need for analytical solutions and improve data management and reporting efficiency.

- Developed backend applications and data-processing solutions using Go, Python, SQL, Apache Kafka, and relational databases to support software automation.
- Designed and optimized SQL queries, RESTful APIs, and backend application logic and evaluated machine learning algorithms by measuring model accuracy and integrating the best-performing models, improving system performance, and data accessibility
- Collaborated with web developers and testing developers, and deploy scalable software solutions while ensuring code quality and successful system integration.

EDUCATION

Master of Science in Data Science

(2024 – 2025)

Teesside University (UK) – (Amity Global Institute, Singapore)

Relevant Coursework: Machine Learning & AI, Statistical Methods, Interactive Visualization, Data Visualization, Big Data & Business Intelligence, Research Method

Master of Computer Science

(2019 – 2023)

University of Computer Studies, Patheingyi (Myanmar)

Bachelor of Computer Science

(2014 – 2019)

University of Computer Studies, Patheingyi (Myanmar)

CERTIFICATIONS

- **Professional Diploma in Business Intelligence and Data Analyst** (Matrix College – 2026)
- **Building a Modern Data Warehouse – Data Engineering Bootcamp** (Udemy - 2026)
- **PySpark – Apache Spark Programming for Beginners** (Udemy – 2026)
- **Analyzing Data with Microsoft SQL, Power BI & Python** (DataCamp KP-2025)

PROJECTS

GitHub Portfolio: <https://github.com/hninwaikhaing-data?tab=repositories>

Retail Sales & Customer Performance Analytics | MySQL, Power BI

- Built an **end-to-end retail analytics and BI solution** using MySQL, SQL, Power BI, and DAX, transforming **complex data** into a star-schema model to analyze sales, customer, product, store, geographic, estimated profitability, and return performance.
- Developed a **5-page interactive Power BI dashboard** with business-focused KPIs and time-intelligence measures, identifying key performance drivers, high-value customer segments, product and store performance, underperforming areas, and return patterns to support data-driven commercial and operational decisions.

Customer Segmentation & Product Performance Analytics Dashboard (E-commerce)

- Developed an interactive Power BI e-commerce analytics solution using Power Query, data modeling, and DAX to analyze customer segmentation, sales, profitability, product performance, YoY growth, and geographic trends.
- Identified revenue drivers, high-value customer segments, product performance, and loss-making products, translating analytical findings into recommendations for margin improvement, customer targeting, product-mix optimization, and regional growth.

Customer Segmentation & Product Performance Analytics Dashboard (E-commerce)

- Developed an interactive **6-page Power BI analytics solution** using **500K+ synthetic logistics records**, building a dimensional data model and DAX KPI framework to analyze delivery reliability, route/facility performance, fleet utilization, fuel efficiency, maintenance reliability, and driver safety.
- Identified a significant service gap between **66.73% On-Time Pickup** and **44.61% On-Time Delivery** and analyzed **\$95.59M in fuel spend, \$5.73M in maintenance costs, and \$2.65M in safety claims**, translating insights into recommendations for operational efficiency, cost control, asset reliability, and safety.
